EDUCATION

Adama Science and Technology University

Adama, Ethiopia

Bachelor of Science in Software Engineering

EXPERIENCE

Backend Engineer

Jul. 2026 – Present

Ideeza

Remote

- Develop enterprise financial and accounting systems with Django and PostgreSQL, including double-entry accounting, payroll, and multi-currency finance modules.
- Design scalable REST APIs and asynchronous processing pipelines using Celery and Redis.
- Improve backend performance through database optimization, caching, and infrastructure tuning.
- Collaborate with frontend and DevOps teams to deliver production-ready enterprise features.

Senior Software Engineer

Feb. 2025 – Present

Gumisofts

Remote (Part-time)

- Architect backend systems for SaaS and fintech products using Django and FastAPI, and design AWS infrastructure (EC2, RDS, S3, CloudFront, ECS).
- Build payment gateway integrations, ERP solutions, and merchant management platforms for commercial clients.
- Lead technical architecture decisions and code reviews; mentor a team of engineers and interns.
- Develop AI-powered product features and CI/CD pipelines with GitHub Actions, cutting deployment time from hours to minutes.

Backend Software Engineer

Sep. 2024 – Feb. 2025

AzCare

San Jose, California (Remote)

- Engineered high-performance web scraping systems processing 1M+ data points daily from healthcare sources.
- Architected scalable AWS S3 data storage solutions with 99.9% uptime and optimized retrieval performance.
- Developed RESTful APIs with FastAPI serving real-time healthcare data to 500+ concurrent users.
- Implemented automated data pipeline workflows, reducing manual processing time by 80%.

Full Stack Software Engineer

June 2021 – Sep. 2024

Syntaxen Software

Addis Ababa, Ethiopia

- Built and published multiple production mobile applications using Django, React Native, and Flutter to the Google Play Store.
- Designed AWS deployment infrastructure and automated provisioning with Docker and Ansible.
- Implemented secure authentication with AWS Cognito and multiple data-pipelining systems.
- Led development teams and mentored interns; established CI/CD pipelines to streamline releases.

Software Engineer Intern

July 2020 – Sep. 2020

Syntaxen Software

Addis Ababa, Ethiopia

- Developed scripts to parse scientific documents from TeX into a structured database.
- Created REST APIs to facilitate efficient data collection and management.
- Built backend APIs for educational platforms using Django, improving content accessibility.

PROJECTS

CribCRM | *React, Fastify, PostgreSQL, OpenAI, Stripe*

2026

- Integrated an OpenAI-powered chat assistant into CribCRM's web and mobile apps (iOS & Android), giving members conversational access to the platform.
- Connected the assistant to CRM context so it can summarize leads and draft follow-ups automatically.
- Shipped the feature across web, iOS, and Android within CribCRM's existing Stripe-based billing platform.

Bita Business | *Python, Django, PostgreSQL, Redis, Celery, Docker, AWS*

2024 – Present

- Designed a multi-tenant SaaS backend for POS, inventory, CRM, accounting, and billing serving Ethiopian businesses.

- Built role-based REST APIs and optimized PostgreSQL queries with Celery and Redis for background processing and caching.
- Implemented inventory, supplier, sales, and financial reporting modules with SMS notifications and subscription billing.

Savana Online Marketplace | *React, Next.js, Django, PostgreSQL*

2024

- Built the backend for a B2B marketplace connecting buyers and verified suppliers across East Africa.
- Implemented product catalog, order management, and in-app messaging APIs with Django and PostgreSQL.
- Designed a supplier dashboard and mobile-first storefront experience with React and Next.js.

TemariCo Mobile | *Flutter, Dart, Django, Firebase, AWS*

Aug. 2021 – 2022

- Built a cross-platform exam-prep app in Flutter serving Ethiopian high school students on Android and iOS.
- Designed the Django backend, secure authentication, and progress-tracking APIs behind the app.
- Deployed and maintained the app on the Play Store, integrating quizzes and analytics.

Gisila | *Dart, PostgreSQL, MySQL, SQLite*

Apr. 2024 – Present

- Built an open-source Dart ORM supporting PostgreSQL, MySQL, and SQLite with a type-safe query builder.
- Designed a schema/migration system and code-generation engine to automate repetitive database code.

TECHNICAL SKILLS

Frontend: React, Next.js, TypeScript, JavaScript, TailwindCSS, Flutter, Dart, HTML/CSS

Backend: Python, Django, FastAPI, Node.js, PostgreSQL, MySQL, MongoDB, Redis, GraphQL, OpenAI API

DevOps & Tools: AWS (EC2, S3, Lambda, Cognito), Google Cloud Platform, Docker, GitHub Actions, Ansible, Git, CI/CD
